

Spartans Security is seeking driven and motivated Penetration Testers (both Senior and Junior) to join the team of security professionals on permanent basis.

We work across a wide portfolio of clients from SME's to national corporate businesses, and help them in identifying security vulnerabilities by conducting ongoing web application, infrastructure and network security scan.

**Key Responsibilities:**

- Work with diverse range of customers to identify and solve security problems.
- Ensure that customer's key infrastructure is secured
- Monitor ongoing customer managed service environment
- Undertake infrastructure and web application penetration testing
- Undertake vulnerability assessments
- Assist in preparing summary and technical reports detailing security issues and providing recommendations
- Dark web and threat monitoring
- Perform incident responses as required

**Key requirements:**

- A degree or relevant qualification in Information technology or Cyber Security
- Commenced in security certifications (or preferably certified) such as OSCP, SANS, CREST, CISM, CISA, CISSP
- A genuine interest in working in the cyber security field
- Willingness to learn and explore new technical areas (training will be provided)
- An understanding of one or more security concepts, e.g.
  - Web Application Security
  - Security technologies such as firewalls, SIEM, IPS, etc...
  - Understanding of Vulnerability assessments process
- An experience in penetration testing is desirable but not mandatory
- Working experience in one of the following:
  - Linux (Kali or Parrot Sec)
  - Windows PowerShell
  - Qualys or Nessus Vulnerability Scanners
  - Metasploit framework
- Excellent attention to detail as well as communication skills

**Benefits**

- Flexible working hours/ work remotely or from home
- Ongoing one-one training coaching and mentoring
- Ability to experience with vast type of technology and cross multiple customer environment.
- Potential for growth with Start-up company
